*Understand how we view  
and live in our natural and  
physical environments.*

*Take this class to see your  
world differently!*

This class explores questions such as:

- Does nature restore us? Do certain designs stress us out?
- How do we use space and place to communicate with ourselves & others?
- How do we get lost and found and make places our own?
- Are humans territorial and how do burglars choose their targets?
- What kind of community design will help humans thrive in the future?
- Is psychology more important than climatology for dealing with climate change?
- How do disasters alter our relationships with our environment?
- How can you use psychology and community design to change behavior to help save the environment?
